# TOMAHAWKCOIN

A Waves Platform based Tomahawkcoin Token,  
was minted with the intention to bridge the two worlds of trading virtual currency and the equity ownership in Tomahawk Exploration LLC, an oil & gas exploration company, managed by David Laurance and registered in Nevada with HQ in Kern County, California.

We have made a great decision on the platform choice for Tomahawkcoin, since wallets for Ethereum Based Tokens are difficult to work with and Ethereum Tokens are facing many flaws such as Golem and others.

"User-friendly wallet. Both your business and your investors/community will benefit from a lite wallet with a clean, intuitive UX. The lite client requires no blockchain download and is available as a Chrome or browser-based wallet, or an Android/iOS app. You might choose to white-label it and brand it for your users, but it's ready to go right away.

Built-in exchange. Waves' decentralized exchange (DEX) is integrated with the desktop lite client, so you don't have to worry about listing on conventional, centralized exchanges. There will always be somewhere for our holders to trade their token, right from day #1."

Tomahawkcoin it's a coin directly backed by oil production, that in turn would create a bigger demand for our coin at the exchanges. It will also be priced at \$0.05, or its USD equivalency in the currently wide and most popular used digital currency such as BTC Ethereum and Waves

Our coin, Tomahawkcoin will not trade with any decimal points, since it cannot be exchanged for a 1 equal equity share of Tomahawk Exploration LLC, if it trades in a fraction of a coin, so all purchases and trades on Crypto Exchanges will take place in exact number of coins without any decimals .

It's not required that owners of Tomahawkcoin convert their coins into equity, but as long as they own Tomahawkcoins they always will have that option.

The more Tomahawkcoins owned, the more equity a person has in Tomahawk Exploration LLC.

# SUPPLY AND DISTRIBUTION

We created 200,000,005 Tomahawkcoins, without the option of creating anymore (Re-Issuable=False), 5 extra coins were made for testing transactions, which were a complete success.

The total Tomahawkcoin number will be set at 200,000,000 coins, and our intention is to have the coin trade on all applicable exchanges for at least 18 months, the time needed for the company to start generating value..

## DISTRIBUTION

Start ICO date July 30th 2017

<https://www.payservices.com/backoffice/ico.php?coin=WTOM>

End ICO date August 30th 2017

Total supply 200,000,005 Tomahawkcoins

50% or 100,000,000 Tomahawkcoins for Crowdsale

1% or 2,000,000 Tomahawkcoin reserved for Bounties

24% or 48,000,000 reserved for salaries, marketing, advertising, Board of directors

25% or 50,000,000 reserved for business acquisitions and market liquidity.

5 Tomahawkcoins already burned.

ICO Url <http://www.payservices.com/>

No Bonus

Goal- \$5,000,000 USD

Acceptance \$500,000 USD

■ ICO TOM amount

■ Business acquisitions, market liquidity TOM amount

■ BOD, salaries, advertising TOM amount

■ Bounties TOM amount

# THE ENGINE BEHIND TOMAHAWKCOIN

## TOMAHAWK EXPLORATION LLC BUSINESS REGISTRATION NEVADA BUSINESS SEARCH FOR TOMAHAWK EXPLORATION LLC

TOMAHAWK EXPLORATION LLC has been registered with the state of Nevada as a private entity specializing in the oil exploration and drilling sector, since 2010 by David Laurance

Tomahawk Exploration LLC capital requirement is \$5,000,000 to commence drilling and thereto function with ease and without restriction towards the main target of commencing drilling of 10 wells available in Kern County California ; therefore, only half or 50%, 100,000,000 Tomahawkcoins will be sold to potential investors, as the other remaining coins will be used for marketing, advertising, and the creation of better liquidity on the coin traded exchange and percentage ownership of the Board of Directors and employees' salaries that will work with the company towards our goal of creating value for our stakeholders and future shareholders in Tomahawk Exploration LLC or the Company.

The estimated price of \$0.05 USD price per Tomahawkcoin is based on the IPO (Initial Public Offering) price expectation of the Company set to start trading on the OTC Market at no less than \$0.05, and 200,000,000 shares outstanding. Due to the volatility of market conditions, known fluctuations in capital markets, changes in economic variables, and risk inherent to the energy sector, there is no guarantee as to price and / or timing which is subject to change. There is no guarantee, implied, or otherwise, as far as, the price of Tomahawkcoin is concerned on any currency traded exchange, since the parity of which Tomahawkcoin will trade for, and against, such as Bitcoin, Ethereum, and / or Waves, have no set price, and no price guarantee in any way or form, due to the constant price volatility of these coins, known to carry their own risk of losing USD value.

The time horizon of 18 months is fundamental to the initial ICO, whereas ICO capital will be used to place Tomahawk Exploration LLC (The Company) into a profitable company and fund the cost of drilling the 10 wells available.

The bold ICO price objective and confident time horizon goal of 18 months is based on the legitimacy of Tomahawk Exploration LLC, an oil & gas exploration company, managed by David Laurance.

# BUSINESS DETAILS, PART 1 OF 3

Only \$500,000 USD will get the company needed funds to commence drilling on two wells, sufficient to generate enough profits and allow the company to open more wells for production.

Obviously, if only \$500,000 is raised less shareholder will have their hands in Tomahawk Exploration LLC, that's not to say that we are not allowed to have the ICO opened until we reach a decent goal, but nevertheless, more equity owners less profits spread among the group.

Tomahawk Exploration LLC can make money as low as \$20 per bbl , so how can we sit by and let events out of our control dictate our business future. Oil demand is increasing World Wide with the 2,000,000 bbls a day surplus being narrowed every year by a combination of our peak being reached and with China and India continuing their growth. The world will always be full of strife and all we need to do is keep going.

Thankfully the actual price per barrel is approaching \$50 and shows no indication of dropping since the US oil reserves are at it's lowest ever, also recent announcement by Trump administration will implement and reinforce restrictions and reductions on importing oil from Venezuela due to recent political events disrupting Venezuela's progress based on a current Dictatorship, as referred to by Donald J. Trump.

We also have received an offer from a prestigious Private Financial firm in New York as follows, if Tomahawkcoin ICO is able to raise a minimum of \$1 Mil USD in cryptocurrency value, they will commit \$10 Mil USD from their portfolio assuring Tomahawk Exploration LLC success.

Due to agreements between both parties, we are not allowed to disclose detailed information regarding the firm's name, but as soon as the goal in discussion is met, the company will make such agreements available for public view.

So with all these factors in place the price per barrel is going to move higher, although not good news for consumers, but great news for investors.

# BUSINESS DETAILS, PART 2 OF 3

How will Tomahawk utilize the oil yields?

There are many other Exploration opportunities to look at with the profits generated from this field. If our business is oil then we would naturally continue to grow the company in the oil sector. There are many companies using several "Steam Flood" methods in California if the oil is either very shallow (500ft) or the oil is thick and hard to pump. The oil in our field can be easily pumped. In the future, when our initial pressure naturally declines, we can utilize a Steam Flood where steam is injected into several wells to both heat and thin the oil and build up pressure to reinvigorate the production to even more than the initial production rates. It would also greatly increase our ultimate recoverable reserves.

How will Tomahawk sell the crude? When we announce a Discovery there are at least 6 large Oil Brokers knocking at our door trying to get a contract to purchase our oil. They would then pick up oil on site and truck it to refineries or pipelines surrounding Bakersfield. About a 30–50 mile trip. We would get about a \$1.50bbl haircut for the Transportation cost.

Let's get into the number factors a little deeper regarding Tomahawk Exploration LLC success.

I will try to make it quick about our project.

We are not "Fracking". Fracking is usually for Shale zones which are very brittle and hard to produce from a vertical well. Fracking is when a well is drilled to the Shale Oil zone and redirected at a 90 degree angle for as much as a mile thru the shale zone which may be several hundred feet thick.

Shale has oil and gas trapped in a very hard zone which needs to be cracked or "Fractured" to give the oil and gas an avenue to escape thru the cracks formed from the injection of sand and chemicals into the mile long "leg" in the Shale.

A well may cost \$4,000,000 to \$6,000,000 each and payout in less than a year. The 2nd years production would drop by 50% and 50% each year afterwards. Our wells decline only 10% to 15% each year after the first because we are in a very permeable sand formation.

# BUSINESS DETAILS, PART 3 OF 3

Tomahawk should recover net to our interest approx. 80,000 bbls per well. If we use a low figure of \$40 per bbl that nets us \$3,200,000 per well if oil never goes above \$40 per bbl. I predict low \$50's in 2018. The Tomahawk wells will cost approx \$500,000 each with oil flowing into the tanks.

Using our finding cost of \$500,000 and finding 80,000bbls shows we are finding oil for \$6.25 per bbl. Producing oil at \$6.25 and selling for at least \$40 should give us a very healthy profit. I really believe that with a future Steamflood we should get at least 200,000 net bbls per well for a profit of \$80,000,000 at \$40bbl. A Steamflood would inject steam into the formation and flush a lot more oil out (Up to 300bopd).

I hope this can clarify Tomahawks position on these matters. Remember, oil and it's derivatives (gasoline, diesel, plastics, medicines, fertilizers, many chemicals, lubrications and countless others) will be needed long after our lifetime. We appreciate your interest in Tomahawkcoin and our future. Hopefully together.

So, what are the projected revenues after drilling?

The Company expects more than \$500,000 USD to be generated by each well per year based on the reserve reports:  
 $10 \text{ wells} \times \$500,000 = \$5,000,000$  a year revenue projection

Our initial plan was to transition from an already Private company to a Public traded one.

But amidst recent news regarding the SEC targeting recently announced ICO's, we decided to best avoid them by staying Private, thus equity owned by our investors would not be subjected to SEC rules and regulations and only state regulations.

The company will also implement a Coin Buy Back program in the future from these exchanges, which remains to be determined based on revenues and profits generated by the company

The business plan provided by the Company is believed to increase the demand for Tomahawkcoin on digital currency exchange markets, such as Bittrex, Poloniex, and others, since ownership equals equity share equivalency, more coins, more voting power and company stake ownership.

# ABOUT KERN COUNTY CALIFORNIA

## Kern River Oil Field

The Kern River Oil Field in south-central California. Other oil fields are shown in gray.

Kern River Oil Field aerial, 2012.

The Kern River Oil Field is a large oil field in Kern County in the San Joaquin Valley of California, north-northeast of Bakersfield in the lower Sierra foothills. Yielding a cumulative production of close to 2 billion barrels (320,000,000 m<sup>3</sup>) of oil by the end of 2006, it is the third largest oil field in California, after the Midway-Sunset Oil Field and the Wilmington Oil Field, and the fifth largest in the United States.[1] Its estimated remaining reserves, as of the end of 2006, were around 476 million barrels (75,700,000 m<sup>3</sup>), the second largest in the state. It had 9,183 active wells, the second highest in the state.[2] The principal operator on the field is Chevron Corporation[3]

## Geographic setting

Kern River Oil Field; view from Panorama Park in Bakersfield, on the blufftop across the river. This is the most densely developed oilfield in California, and the fifth-largest producer (as of 2006) in the US.

The Kern River Oil Field covers an area of 10,750 acres (43.5 km<sup>2</sup>) in a rough oval extending over the low hills north-northeast of Bakersfield, hills which are now almost completely barren except for oil rigs, drilling pads and associated equipment. This area is the densest operational oil development in the state of California: Midway-Sunset, which has more wells, is almost three times as large in surface area, for a lower overall density. Elevations on the Kern River Oil Field range from approximately 400 to 1,000 feet (300 m), rising towards the northeast, and the Kern River flows south of the field, from east to west, from the Sierra Nevada into the city of Bakersfield.

The oil field is one of many contiguous oil fields along the eastern edge of the southern San Joaquin Valley, lying between the Kern Front field to the northwest and the Kern Bluff field to the southeast, on the other side of the Kern River. Directly north of the Kern River field is the large Mount Poso Oil Field, entirely in the Sierra foothills, and to the northeast is the Round Mountain Oil Field.

Kern County produces 66% of the oil in California, about 10% of the U.S. oil supply, and approximately 1% of the world's total oil production. That works out to about 560,000 barrels of oil per day, which at \$12 to \$15 per barrel is something like \$2.4 billion to \$3.0 billion worth of oil every year.

# DAVID LAURANCE

We have made sure that our team and Board of Directors are refined successful citizens with flawless backgrounds, verifiable credentials, heroes, public activists, and skilled individuals with great experience in both business and digital currency.

## **David Laurance**

President / CEO, Tomahawk Exploration LLC

Is an experienced oil and gas exploration veteran with over 40 years participating in drilling over 300 wells in 11 states in the United States and internationally: Canada, Colombia, Indonesia, and Oman.

Mr. David Laurance remains firm on his position of environmental accountability in the oil and gas exploration industry. David Laurance's commitment to State and Federal environmental compliance assures that his efforts to find new fuel extraction opportunities produces minimal impact on the surrounding environment.

He has joint ventured with Chevron, Phillips, and Union Oil in California and with El Paso Natural Gas in Oklahoma. His career in the Energy sector began as a developer of alternative sources of electrical generation and storage for Pacific Power and Light in Portland, Oregon. He developed a process that used off-peak hydroelectric power to convert into hydrogen, which could be used to fuel gas turbines for use during peak demand.

His executive leadership positions include President and Chairman of multiple public oil & gas exploration and production companies. In addition, Mr. Laurance founded and served as principal of The Laurance Group, a venture capital company, which owned major interests in two brokerage firms underwriting and syndicating public offerings. He managed several energy exploration and production limited partnerships before his first Initial Public Offering in 1980. Prior to entering into the oil & gas sector from 1970 to 1974, he held several key positions with California Sports, Inc., the holding company for the Los Angeles Lakers, The Los Angeles Kings, and the Inglewood Forum.

Mr. Laurance served as Chair at the California Water Management 2014 Hydraulic Fracturing & Steam Generation Congress in Bakersfield developing cost-effective strategies for water disposal and treatment for reuse in hydraulic fracturing, steam generation & waterfloods including reverse osmosis, ionization, chemical treatment, percolation ponds as well as disposal permitting, SB4, AB32 stakeholder engagement, public education, aquifer protection, water re-use in agriculture and hydraulic fracturing regulations in California. He majored in geology and physics at Southern Oregon University and the University of Oregon. Mr. Laurance is a member of Mensa

# RICK SHADDOCK

Rick Shaddock  
Board Member

Mr. Rick Shaddock has provided computer consulting, programming, and training services since 1985 to Washington DC area US Government agencies, military branches, embassies, corporations, associations, and organizations.

Clients include: Congressmen (example Ben Gilman), Senators (Phil Gramm), Ambassadors (Armenia, British, Canadian, El Salvador, Honduras), Centcom (Iraq), U.S. Military (Army – Air Force – Coast Guard – Marines – Navy, General Barry McCaffrey), USDA, Dr. John Hagelin, White House Commission on Remembrance, and the Business Manager of the Rolling Stones.

Rick's company C I Corporation serves locations nationally as well as internationally.

For the World Bank he has traveled overseas, as well as helping people through the internet. CIC is a certified vendor for Dell, Hewlett Packard, Toshiba, and Electronic Health Record (EHR) systems.

Specialties: A+ (CompTIA), Microsoft Desktop (MCDST), SQL Database, and Windows Server Support Technician. Proficient with MS Access, Excel, Access, VB, FoxPro, plus ACT!, Broker's Ally, FileMaker, Goldmine, NetSuite, Salesforce, Sharkware, NetSuite, and eClinicalWorks

Database Conversion: Has developed programs to convert over 2500 databases, mostly CRM systems, such as data migrations from Goldmine to ACT! as TheConverter.net

Rick is always continuing his education, and posts his scientific research papers and articles at [www.ShaddockResearch.org](http://www.ShaddockResearch.org) such as the study showing that years of practicing Transcendental Meditation (TM) is correlate positively with Critical Thinking Ability (CTA) and open mindedness.

Rick Shaddock is the CEO of Association of Digital Currency with HQ in Washington DC.

# HORIA CRETAN

Horia Cretan  
Chief Information Officer

Acting as Chief Information Officer of Tomahawkcoin, he provides vision and leadership in the development, ICO launch, and management of the TomahawkCoin.com digital currency enterprise. Mr. Cretan is responsible for driving virtual currency new business initiatives, controlling performance objectives, and coordinating processes across the enterprise to optimize operations, integrate technology and business to innovate, and ensure security and compliance

Mr. Horia Cretan is a native of Romania, a US resident for the last 23 years with extensive computer knowledge, a Professional degree in Telecommunications, an Ordained Minister of the Universal Life Church Ministries, owned several successful businesses in New York Tri State Area,

An Awarded Hero in The Bronx NY, recipient of many awards from entities, organizations and people of high rank, such as Daily News, Mr. Ruben Diaz Jr the current Bronx Borough President awarded Mr. Horia Cretan with a Citation of Merit in the name of 4,1 Million citizens of The Bronx , from Gustavo Rivera, a New York State Senator, The Supreme Master Ching Hai International Association, proclaimed and received the "Outstanding Citizen " award by the Detectives Crime Clinic of which he is a proud member to date.

Also received the Civilian Courage Award from Bronx Community Society of the Prevention Against Cruelty to Children, has had many TV appearances, on daily shows like, Good Morning America, Fox 5, Fox and Friends, Inside Edition, Ellen Degeneres Show and even CNN.

Horia Cretan is Vice President of Investor Relations at Association for Digital Currency with HQ in Washington DC, of which Mr. Rick Shaddock is the Founder and CEO.

# DISCLAIMER AND CONCLUSION

The information contained herein, while obtained from sources believed to be reliable, is not guaranteed as to its accuracy or completeness. This disclosure contains certain forward-looking statements that involve substantial known and unknown risks and uncertainties that are beyond management's control. No assurance can be given that any of the events anticipated by the forward statements will transpire or occur, or if any of them do so, what benefits will be derived therefrom. This information is for general background purposes only and does not constitute an offer to sell or a solicitation to buy the securities referred to in the information presented.

This information can be considered as an agreement between Company and its stakeholders. For every stakeholder of Tomahawkcoin, such document will be available for download or, mailed to each individual with ownership of Tomahawkcoin. Those details will be refined since we respect our stakeholders' and future shareholders' identity. Each agreement will have to be addressed to each individual by correct, full and legal name, as well as complete address or place of residence, to ensure legal ownership of stock certificates.

Please visit us on social media and leave your feedback, also be sure to view our site, since we are in the beginning stages please be courteous, but feel free to add suggestions, we value your opinion and want this project to have a very transparent model for future businesses, since investors deserve nothing but the best for their support and complete honesty as well as constant updates and progress.

We believe strongly that our community should be considered family, and we promise to work hard for you, since your success is our success, one cannot survive without the other, our great team of professionals put a strong business plan together to ensure that in the future through possible acquisitions of subsidiaries and already successful businesses, we can substantially add value to our endeavor and our future shareholders.

**The team at Tomahawk Exploration LLC thanks everyone for their support, and God Bless us all!**

ICO page Host will take place at **Pay Services** on July 30<sup>th</sup>
